ANALYST REVIEW REQUIRED — decision support only; not a rating, not a probability of default, not a lending decision.

Amounts in USD millions unless stated. Every number is inserted from the deterministic engines and cited in brackets; the appendix gives each source.

Executive assessment

After the facility, net debt / EBITDA would be 1.06x, against 1.06x before it, with EBITDA / interest at 25.94x.[1–3] The next-FY accounting-stress screen is 1.0%, in the low band.[4–5] The maximum net debt / EBITDA covenant of 3.50x holds in the downside case, with headroom of 2.17x.[6–7] Figures come from SEC 10-K XBRL filings; the memo supports analyst judgement and makes no lending decision.[8]

Financial profile

Revenue was USD 87,032m, up 3.3% year on year.[9–10] EBITDA, approximated as operating income plus depreciation and amortization, was USD 22,908m, a margin of 26.3%, against 27.6% a year earlier.[11–13] Operating cash flow of USD 19,556m covered capital expenditure of USD 4,409m, leaving simple free cash flow of USD 15,147m.[14–16] Gross debt stood at USD 34,136m and cash at USD 9,942m, for net debt of USD 24,194m.[17–19] Net debt / EBITDA was 1.06x and EBITDA / interest 26.12x.[2, 20]

Key strengths

Leverage is moderate, with net debt / EBITDA of 1.06x.[2] Interest is comfortably covered, with EBITDA / interest of 26.12x.[20] The business generated positive free cash flow of USD 15,147m.[16]

Key risks

The current ratio of 0.68x is below one, so current liabilities exceed current assets.[21] Reported cash includes restricted cash that the filing does not separate, so net debt and net debt / EBITDA may be understated.[22] Some inputs were derived or approximated (1 data warnings); see the evidence appendix.[23]

Neural stress screen

The neural stress screen puts the chance that next year's accounts show financial stress at 1.0%, in the low screening band.[4–5] The largest contributions came from operating cash flow to assets (lowering the score) and company size (lowering the score).[24–25] On held-out years the model reached a precision-recall AUC of 0.805, against 0.825 for an XGBoost benchmark.[26–27] The screen is an indicator of accounting stress, not of default, and is one input to analyst judgement.

Stress cases

In the base case gross debt rises to USD 34,236m; net debt / EBITDA is 1.06x and EBITDA / interest is 25.94x.[1, 3, 28] In the downside case (EBITDA -20%, rates +200 bp) net debt / EBITDA is 1.33x and EBITDA / interest is 20.71x.[29–31] In the severe case (EBITDA -35%, rates +400 bp) net debt / EBITDA is 1.63x and EBITDA / interest is 16.79x.[32–34] In the analyst's own case (EBITDA -10%, rates +100 bp) net debt / EBITDA is

1.18x and EBITDA / interest is 23.32x.[35–37] Proceeds spent on capex or acquisitions are assumed to add no EBITDA.

EBITDA / interest	26.12x	25.94x	20.71x	16.79x	23.32x
Headroom: max net debt / EBITDA	—	pass +2.44x	pass +2.17x	pass +1.87x	pass +2.32x
Headroom: min EBITDA / interest	—	pass +22.94x	pass +17.71x	pass +13.79x	pass +20.32x

Headroom is the distance to the covenant limit; a breach shows the shortfall. Not testable means the ratio is undefined (EBITDA at or below zero, or no interest expense); it is not counted as a breach. EBITDA shocks move EBITDA by a share of its size, so a downside deepens a loss.

Covenant headroom

Against a maximum net debt / EBITDA of 3.50x, in the base case headroom is 2.44x.[6, 38] In the downside case headroom is 2.17x.[7] In the analyst's own case headroom is 2.32x.[39] Against a minimum EBITDA / interest of 3.00x, in the base case headroom is 22.94x.[40–41] In the downside case headroom is 17.71x.[42] In the analyst's own case headroom is 20.32x.[43]

Diligence questions

Is a maximum net debt / EBITDA covenant of 3.50x appropriate given the downside headroom?[6] How much of the existing debt is floating-rate, and is it hedged? Does operating income include one-off items that an adjusted EBITDA would remove? Close the data gaps listed in the appendix before committee.
